Perfect for your  
active lifestyle

Gives energy for  
the entire day

Heightens  
mental clarity

## THE FULL POWER OF THE TEA LEAF

**Matcha is more than just tea.** This special green tea has long been a part of the traditional Japanese tea ceremony. The Chi-Oka Matcha used for Matcha Energy is cultivated in the shade and grows much slower. This elaborate cultivation method significantly increases the nutrient content of the tea leaf.

You will feel the difference with every sip – Matcha tea leaves aren't steeped in water but are ground to a fine powder and dissolved in the tea water. Thus every sip of Matcha Energy gives you all nutrients contained in the leaf - chlorophyll, antioxidants and numerous vitamins.

More information on our scientific work on Unimate and other Unicity products can be found at [unicityscience.org](http://unicityscience.org).

# GEAR UP WITH GREEN ENERGY

Matcha Energy contains pure Chi-Oka Matcha blended with other valuable ingredients such as rhodiola as well as pomegranate and grape seed extracts. Its numerous nutrients help to stimulate

the metabolism and ensure that you stay fit and focused. This makes Matcha Energy perfect for athletes who need a healthy energy drink for strenuous workouts and optimal training results!

## CAFFEINE AND THEOPHYLLINE

reduce fatigue and have a stimulating effect. They are slowly absorbed and broken down by the body via the intestines - ideal for avoiding sudden performance lows, which are typical of many energy drinks.

## VITAMIN C

contributes to the protection of cells from oxidative stress and supports the normal function of the immune system.

## NIACIN (VITAMIN B3)

contributes to the reduction of tiredness and fatigue.

## THIAMINE (VITAMIN B1)

contributes to normal mental function.

## PANTOTHENIC ACID (VITAMIN B5)

contributes to normal mental performance.

## RECOMMENDED USE

Mix the contents of one sachet with 8.5 oz. (250 ml) of water and drink once a day.

**Tip:** Serve Matcha Energy on ice  
- the best summer drink!
